A great looking skin, but I'm slightly annoyed at the devs since this was supposed to be an exclusive skin as part of Smash Summit. Plus, it cost 2.99 at Smash Summit. That being said, looks good.. Holy is it pretty. Very pretty skin! it has a nice snow animation above Kragg, so it gives the skin a bit of extra value.. It makes his rocks look like the flag of poland which is amazing, would definitely spend 2 bucks just to hit people with poland blocks.. As a Kragg main this is the only skin I use. It makes me very happy.. Issa good skin. If you wanna spend money and play Kragg, here ya go.. It's pretty cool, also if you look at the image, it does indeed have white particles around kragg. Good skin. Love the taunt as well.

>.<. It's a really nice skin. It comes with new coloring, a new taunt (it is okay), new looks on all your abilities (same as coloring), and most importantly, the beautiful snowing particle effect.

A little bit high at \$2 though.

Looks nice, I like.. COC-RAGG!!!

But Seriously, Jokes aside, This Skin Is Great For People Who Dont Have A Special Skin And It's Cheap. I like this skin, as a Kragg main. It makes me feel special in a way.
